Colocation

The best location for your IT&T equipment

Telstra Wholesale Colocation lets customers rent space for their IT&T equipment in a secure, reliable, and cost-efficient managed environment. Our colocation centres are housed in Telstra exchanges and provide features to control the environment and guard against threats to networks, including power outages and surges.

The full suite of Telstra Wholesale products is already in the building, making it faster, easier and more cost-effective to access these products and expand networks quickly and efficiently to meet changing business needs.

Colocation is suitable for all Telstra Wholesale customers who want to house their equipment in a secure, reliable, controlled environment without having to find or build appropriate floor space. This includes carriers, ISPs, data storage providers, and corporate LAN providers, ranging from large corporations to small businesses.

Customer benefits	Product features
Flexibility	Faster response to changing business needs and opportunities, quickly reflecting customer business decisions.
Ease, simplicity and peace of mind	Eliminating need to find build and manage suitable premises or take up valuable office space.
Protection	Telstra Wholesale Colocation guards against, power outages and surges with our Redundant Uninterrupted Power Supply (UPS) and back-up diesel generators.
Coverage	Unparalleled access and reach to service our customers' national needs.

Features

- UPS, power feeds, cable feeds, air conditioning, security and fire protection.
- The full suite of Telstra Wholesale products readily available, making customer access faster, easier and more cost-effective, assisting expansion of networks in response to changing business needs.
- Premium Colocation centres at Telstra's two largest exchanges in Sydney and Melbourne, featuring the highest level of security, with quality extras and features.
- Colocation centres at Telstra exchanges in Brisbane (Woolloongabba), Adelaide (Waymouth) and Perth (Wellington).

Benefits

- Reduced latency;
- Shorter activation and faster fault restoration time frames;
- Reduced or eliminated tie-cable fees for activation and rent;
- Eliminated risk of network outage from cuts in cables in streets;
- More secure connectivity with Telstra Wholesale products;
- Greater reliability through fewer points of failure, (eg. there is less SDH equipment between switches for a wholesale transmission link between Sydney and Melbourne if they are housed in Telstra Wholesale Colocation to an external data centre);
- Easier, faster, cost-effective maintenance;
- Convenience of a partnership with a single provider.

CUSTOMERS CAN RENT SPACE FOR VALUABLE IT&T EQUIPMENT IN A SECURE, COST-EFFICIENT AND RELIABLE MANAGED ENVIRONMENT.

Coverage

Colocation gives customers the best access to Telstra's unparalleled networks. The expansion of Telstra Wholesale Colocation into more capital cities, and future expansion to regional Colocation, will facilitate the expansion of our customers' business boundaries.

Ordering

An application pack can be obtained from a Telstra Wholesale account manager, and new customers can register on our website www.telstrawholesale.com.

Related products

Colocation is not sold in isolation, but is bundled with other Telstra Wholesale products such as Telstra Wholesale Internet (TWI), Wholesale Business Grade Ethernet, Wholesale Transmission or Data Access Radial (DAR).

More information

A Telstra Wholesale account manager can provide further information on Colocation. Details are also available on our website www.telstrawholesale.com.
