

TEBA

Capped sites for Telstra Equipment Building Access (TEBA)

The following list of TEBA sites shows the sites that have been capped and currently have no floor space and/or MDF space available for TEBA.

This is a dynamic list which is updated approximately monthly. Sites currently listed below may be removed from the list if space becomes available in the future (for example, because of completion of capital works or changes in requirements).

“Racks & MDF capped” means that there is neither rack space nor space available on the main distribution frame.

“Racks Capped” means that there is still space available on the MDF, and customers may be able to house their DSLAMs external to the Telstra exchange and apply for an External Interconnection Cable to connect to the exchange MDF.

“Potential” means room may be available after a full consultation with the Area Planner to determine the scope of works required to establish the TEBA area. Scope of works for “Potential” sites may include, but is not limited to, works such as converting Non-equipment rooms into Equipment rooms, removing decommissioned equipment or upgrading major building facilities (e.g. AC Switch boards, EPP, and Central air conditioning plant.). The amount of space able to be made available by undertaking such works may be limited. Customers wishing to assess these sites should submit a PSR.
